

# COSPHADERM® PA-12

Cosphatec

Cosphaderm® PA-12 is a powder product consisting of the sodium salt of phytic acid, which acts as a strong natural chelating agent and is effective across a wide pH range. Derived from the soak water of corn bran, Cosphaderm® PA-12 is completely natural and COSMOS-approved. Like other chelators, sodium phytate can contribute to preservation strategies by sequestering physiologically important metal ions. Its chelating properties additionally provide antioxidant functionality by preventing the formation of reactive oxygen species while also reducing discolouration of cosmetic products.

## Benefits:

- Powder with high water solubility
- Natural EDTA substitute product
- Effective across a wide pH range
- Prevents formation of reactive oxygen species

16128

## ISO 16128

Natural Index	1
Natural Origin Index	1

<b>INCI name</b>	Sodium Phytate
<b>Source</b>	Corn
<b>Efficacy Spectrum</b>	<b>Bacteria:</b> ● <b>Yeast:</b> ● <b>Mould:</b> ●
<b>Recommended concentration [%]</b>	0,10 - 0,30
<b>Substance Class</b>	Organic acids
<b>Function</b>	• Chelation
<b>Type of Formulation</b>	• O/W • Surfactant-based • Water-based • Waterfree
<b>Solubility</b>	• Water-soluble
<b>Appearance</b>	Crystalline powder
<b>Colour</b>	White
<b>Odour</b>	Odourless
<b>Combinable products</b>	• Cospagard® SA natural
<b>Item No.</b>	07-020-xxxx
<b>CAS No.</b>	14306-25-3
