COSPHADERM® PA ECONAT

Cosphatec

Cosphaderm® PA ECONAT is a 50 % aqueous solution of phytic acid that acts as a powerful natural chelating agent, effective across a broad pH range, Sourced from the soaking water of maize or rice bran, the ingredient is 100 % natural and COSMOS-approved, making it well suited for modern and natural cosmetic formulations,
By binding physiologically relevant metal ions, phytic acid supports preservation concepts and helps improve formulation stability, In addition to its chelating function, Cosphaderm® PA ECONAT provides antioxidant benefits by preventing the formation of reactive oxygen species, This mechanism further contributes to reduced discolouration of cosmetic products,

Benefits:
- Natural EDTA substitute product
- Effective across a wide pH range
- Prevents formation of reactive oxygen species

ISO 16128

Natural Index	1
Natural Origin Index	1

INCI name	Phytic Acid, Aqua
Source	Corn Rice
Recommended concentration [%]	0,10 - 0,30
Substance Class	Organic acids
Function	• Chelation
Type of Formulation	• O/W • Surfactant-based • Water-based
Solubility	• Water-soluble
Appearance	Clear liquid
Colour	Colourless to brownish
Odour	Odourless
Item No.	07-010-xxxx
CAS No.	83-86-3 7732-18-5
