

# COSPHADERM® SODIUM HYALURONATE LOW

Cosphatec

Cosphaderm® Sodium Hyaluronate low is the sodium salt of low-molecular-weight hyaluronic acid, produced by all-natural fermentation and physical purification processes. In human tissue, hyaluronic acid is an essential part of the extracellular matrix. It binds water and serves as a natural humectant and anti-ageing ingredient for the skin, guaranteeing its elasticity and moisture retention. Due to its low molecular weight of less than 50 kDa, Cosphaderm® Sodium Hyaluronate low can penetrate deeper into the skin. With regular use, it can contribute to a reduction in wrinkle depth, provide long-lasting moisturisation and increase skin elasticity.

## Benefits:

- Proven anti-ageing properties
- Long-term anti-ageing effect
- Low molecular weight

16128

## ISO 16128

Natural Index	1
Natural Origin Index	1

**INCI name** Sodium hyaluronate

**Source** Corn  
Soy

**Recommended concentration [%]** 0,10 - 0,20

**Substance Class** Polysaccharides

**Function**

- Anti-ageing
- Humectant
- Skin conditioning

**Type of Formulation**

- O/W
- Surfactant-based
- W/O
- Water-based
- Waterfree

**Solubility** • Water-soluble

**Appearance** Powder

**Colour** White

**Odour** Characteristic

**Combinable products**

- Cosphaderm® Sodium Hyaluronate high
- Cosphaderm® Sodium Hyaluronate

**Item No.** 07-014-xxxx

**CAS No.** 9067-32-7
