

COSPHADERM® SODIUM HYALURONATE

Cosphatec

Cosphaderm® Sodium Hyaluronate is a medium-molecular-weight sodium hyaluronate produced by all-natural fermentation and physical purification. As a naturally occurring part of the extracellular matrix, hyaluronic acid is known for its strong water-binding ability and its performance as a humectant and anti-ageing ingredient that helps maintain skin elasticity and moisture levels.

At approximately 1500-1800 kDa, Cosphaderm® Sodium Hyaluronate delivers wrinkle-filling, viscosity-building, and anti-inflammatory benefits. While it does not penetrate into deeper skin layers, it helps minimise the appearance of wrinkles by forming a moisturising film on the skin surface for an immediate anti-ageing effect.

Benefits:

- established anti-ageing efficacy for smoother-looking skin
- Immediate anti-ageing effect through surface hydration and wrinkle filling
- Medium molecular weight ideal for film-forming and viscosity enhancement

16128

ISO 16128

Natural Index	1
Natural Origin Index	1

INCI name	Sodium hyaluronate
------------------	--------------------

Source	Wheat Corn Soy Sugar cane
---------------	------------------------------------

Recommended concentration [%]	0,10 - 0,30
--------------------------------------	-------------

Substance Class	Polysaccharides
------------------------	-----------------

Function	• Humectant • Skin conditioning
-----------------	------------------------------------

Type of Formulation	• O/W • Surfactant-based • W/O • Water-based • Waterfree
----------------------------	--

Solubility	• Water-soluble
-------------------	-----------------

Appearance	Powder
-------------------	--------

Colour	White
---------------	-------

Odour	Characteristic
--------------	----------------

Combinable products	• Cosphaderm® Sodium Hyaluronate low • Cosphaderm® Sodium Hyaluronate low 5 • Cosphaderm® Sodium Hyaluronate
----------------------------	--

Item No.	07-012-xxxx
-----------------	-------------

CAS No.	9067-32-7
----------------	-----------
