

COSPHADERM® SODIUM HYALURONATE HIGH

Cosphatec

Cosphaderm® Sodium Hyaluronate high is a high molecular weight sodium salt of hyaluronic acid produced by all-natural fermentation and physical purification processes. In human tissue, hyaluronic acid is part of the extracellular matrix. It binds water and serves as a natural humectant and anti-aging ingredient for the skin, guaranteeing its elasticity and moisture retention. Due to its high molecular weight of at least 2000 kDa, Cosphaderm® Sodium Hyaluronate high has excellent wrinkle filling, viscosity increasing and anti-inflammatory properties. It cannot penetrate deeper skin layers but minimizes the appearance of wrinkles by forming a moisturizing film on the skin surface for an instant anti-aging effect.

- Well-established anti-aging properties
- Instant anti-aging effect
- High molecular weight

COSMOS
APPROVED

16128

ISO 16128

Natural Index 1

Natural Origin Index 1

INCI-Name Sodium Hyaluronate

Source Corn, Soy

Recommended concentration [%] 0.10 - 0.30

Substance Class Polysaccharides

Function

- Humectant
- Film forming
- Skin conditioning
- Viscosity control

Type of Formulation

- O/W
- W/O
- Surfactant Based
- Waterfree
- Water-Based

Solubility • Water-soluble

Appearance Powder

Colour White

Odour Characteristic

Combinable Products

- Cosphaderm® Sodium Hyaluronate low
- Cosphaderm® Sodium Hyaluronate low 5
- Cosphaderm® Sodium Hyaluronate

Item No. 07-013-xxxx

CAS No. • 9067-32-7
