

COSPHADERM® SODIUM HYALURONATE

Cosphatec

Cosphaderm® Sodium Hyaluronate is the sodium salt of medium molecular weight hyaluronic acid produced by all-natural fermentation and physical purification processes. In human tissue, hyaluronic acid is an essential part of the extracellular matrix. It binds water and serves as a natural humectant and anti-aging ingredient for the skin, guaranteeing its elasticity and moisture retention. Due to its medium molecular weight of approximately 1500 to 1800 kDa, Cosphaderm® Sodium Hyaluronate has wrinkle filling, viscosity increasing and anti-inflammatory properties. It cannot penetrate deeper skin layers but minimizes the appearance of wrinkles by forming a moisturizing film on the skin surface for an instant anti-aging effect.

- Well-established anti-aging properties
- Instant anti-aging effect
- Medium molecular weight

COSMOS
APPROVED

16128

ISO 16128

Natural Index	1
Natural Origin Index	1

INCI-Name Sodium Hyaluronate

Source Wheat, Corn, Soy, Sugar cane

Recommended concentration [%] 0.10 - 0.30

Substance Class Polysaccharides

Function

- Skin conditioning
- Humectant

Type of Formulation

- W/O
- Surfactant Based
- Waterfree
- Water-Based
- O/W

Solubility • Water-soluble

Appearance Powder

Colour White

Odour Characteristic

Combinable Products

- Cosphaderm® Sodium Hyaluronate low
- Cosphaderm® Sodium Hyaluronate low 5
- Cosphaderm® Sodium Hyaluronate

Item No. 07-012-xxxx

CAS No. • 9067-32-7
