

COSPHADERM® T-70 NON GMO SOY

Cosphatec

Cosphaderm® T-70 NON GMO Soy is a blend of soy oil and mixed tocopherols from NON GMO vegetable sources. It contains a minimum total amount of 70% tocopherol with high proportions of beta, gamma and delta isoforms. Tocopherols are widely used as ideal natural antioxidants for protection of oil and fat components susceptible to oxidation. Cosphaderm® T-70 NON GMO Soy can therefore stabilize cosmetic formulations in terms of discolouration as well as odour and ideally facilitates shelf-life extension.

- Natural antioxidant from non-GMO sources with excellent cost-efficiency
- Minimum 70% tocopherol content
- Protects oxidizable components in cosmetic formulations
