

COSPHADERM® T-70 NON GMO

Cosphatec

Cosphaderm® T-70 NON GMO is a blend of sunflower oil and mixed tocopherols from NON GMO vegetable sources. It contains a minimum total amount of 70% tocopherol with high proportions of beta, gamma and delta isoforms. Mixed tocopherols are widely used as ideal natural antioxidants for protection of oil and fat components susceptible to oxidation. Cosphaderm® T-70 NON GMO can therefore stabilize cosmetic formulations in terms of discolouration as well as odour and ideally facilitates shelf-life extension.

- Natural antioxidant from non-GMO sources
- Minimum 70% tocopherol content
- Protects oxidizable components in cosmetic formulations

16128

ISO 16128

Natural Index	1
Natural Origin Index	1

INCI-Name Tocopherol, Helianthus Annuus Seed Oil

Source Soy, Sunflower

Recommended concentration [%] 0.05 - 0.20

Substance Class Tocopherols

Function

- Skin conditioning
- Antioxidant
- Product protection

Type of Formulation

- O/W
- W/O
- Surfactant Based
- Waterfree

Solubility • Oil-soluble

Appearance Clear, viscous oil

Colour Yellow to brownish red

Odour Typical vegetable oil

Combinable Products • Cosphaderm® AP

Item No. 04-004-xxxx

CAS No.

- 1406-66-2
- 8001-21-6
