

COSPHAGARD® SA NATURAL

Cosphatec

Cosphagard® SA natural is 100% naturally sourced and COSMOS-approved salicylic acid made from natural wintergreen oil by mild fermentation and two-step purification. Salicylic acid has been sourced traditionally from willow trees. Willow bark extract has played a role in traditional herbal medicine in many cultures and the extract of dried bark is still used as a drug in tea or natural medicine. Salicylic acid is a well-known active and listed Preservative that has been used for its antimicrobial, keratolytic and anti-inflammatory activity in products against acne and dandruff for many years.

- 100% naturally derived
- Active substance with antimicrobial properties

COSMOS
APPROVED

16128

ISO 16128

Natural Index	0
Natural Origin Index	1

INCI-Name Salicylic Acid

Source Wintergreen

Efficacy Spectrum

Bacteria:	●
Yeast:	●
Mould:	○

pH-range max. 5.5

Recommended concentration [%] 3.00

Substance Class Organic Acids

Function

- Skin conditioning
- Anti-seborrheic
- Keratolytic
- Preservative

Type of Formulation

- O/W
- W/O
- Surfactant Based
- Waterfree
- Water-Based

Solubility • Water-soluble

Appearance Crystalline powder

Colour White to off-white

Odour None to faint characteristic

Item No. 03-006-xxxx

CAS No. • 69-72-7
