

## ORDER OF A CHALLENGE TEST SERVICE FROM COSPHATEC

To place an order for a challenge test, Cosphatec requires detailed information on the formulation to be tested. This includes the selected challenge test method, details of the preservative system (product/INCI and concentration), the formulation pH, and the formulation type. For challenge testing, **250 g** (ISO 11930) or **300 g** (Ph. Eur.) of each sample are required.

Please complete the form below as accurately and completely as possible to ensure efficient processing of your order.
